

Solar Heating Canada

Solar Heating Canada Dealership Request Form

Dealership Requirements

1. Own an established Canadian company that has been in operation for at least 3 years.
2. Possess a background in renovations, construction, plumbing or heating.
3. A qualified dealer or installer must purchase a domestic hot water package and install it upon signing of the dealership agreement.
4. Dealers must be capable of purchasing and stocking solar panels and equipment at their facilities.
5. Must have adequate insurance and liability coverage.

How to Become a Dealer

In order to become a dealer you must first fill out the form below and a sample dealership agreement form will be sent to you for review. Once you have agreed to the terms a meeting will be setup where the agreement will be signed. Upon signing of the agreement you must purchase a domestic hot water system kit and install it. With this kit you will receive a dealer package which identifies product specifications, information brochures, flyers and various other documents to support your sales and installation teams.

Benefits of Becoming a Dealer and/or Installer

1. Access to the latest research and development in the solar thermal industry
2. Access to special dealer and installer prices
3. Directed customer inquiries in your area
4. Access to solar engineers for custom project planning assistance
5. Access to supporting documents to help sell systems to potential clients
